Allowable Subject Matter

1. Claims 1-20 are allowed.
2. The following is an examiner's statement of reasons for allowance: Regarding claims 1-20, the prior art fails to teach of a first clock regenerator connected to the data link at the rotary slipping module and a second clock regenerator connected to the receiver at the stationary slip ring module, the first and second clock regenerators synchronizing the gigabit/sec data, proceeding from the first data link and proceeding to the second data link, to a stable reference clock to prevent the jitter from proceeding from the source to the receiver. The closest reference, Guynn et al. (U.S. Patent No. 6,437,656), teaches of a slip ring system that transfers information between a moving frame and a stationary frame. The slip ring system includes Gbit/sec data rates, but fails to teach of a first clock regenerator connected to the data link at the rotary slipping module and a second clock regenerator connected to the receiver at the stationary slip ring module, the first and second clock regenerators synchronizing the gigabit/sec data, proceeding from the first data link and proceeding to the second data link, to a stable reference clock to prevent the jitter from proceeding from the source to the receiver. Additionally, Kudo (U.S. Patent No. 5,402,461), teaches of an X-ray computed tomography apparatus that includes a fixed section, a routing frame section and a slip ring, but fails to teach of first and second clock regenerators.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
